

STAINING PREVENTION METHOD FOR DRY PART OF PAPER MACHINE AND
STAINING INHIBITOR USED FOR THE METHOD

Abstract

ABSTRACT

_____ A simple method capable of effectively preventing ~~drydrying~~ part areas, at least the surfaces of cylindrical dryers, from being stained, even if a spray space is absent in a paper machine. The method can prevent the contact part of the ~~drydrying~~ part (D) of the paper machine with a paper body from being stained. The ~~drydrying~~ part staining prevention method can continuously feed/apply a staining inhibitor (T) to the paper body (W) at a position just before the ~~dry~~ ~~parts~~drying part.
